

Expansion of long relationship with Microsoft

Brian J. Scott
Vice President, Worldwide Industry
Microsoft Corporation

“Microsoft Office SharePoint Server 2007 is breaking the milestone of 100 million licenses sold this year. Capitalizing on this momentum, PTC has developed Windchill ProductPoint based on the SharePoint platform and .NET framework. With Windchill ProductPoint, PTC extends the collaboration capabilities of SharePoint to offer product development companies the ability to manage and share structured product content in multiple CAD formats. Microsoft and PTC have built a deep relationship throughout the development of Windchill ProductPoint and we look forward to furthering our partnership.”
